of this House is preventing us from getting votes on three amendments: one to ensure that our friends in New York get the relief they were promised 2 months ago; the second to make certain that we increase the Pentagon budget in areas thought necessary; and, third, to increase our homeland security.

Mr. Speaker, I urge the leadership of this House to allow us to vote on those three amendments. They do not need to vote for them, just allow us to vote on them.

There was an amendment today offered on New York which purports to take care of those problems. With all due respect, in my view, any Member of the New York delegation who tries to walk around in public using that as a fig leaf would be arrested for indecent exposure because that amendment does virtually nothing. It gives no political cover; and it should not, because it provides no substantive improvement.

I urge the House to allow us to vote on those three amendments. This involves the national security of the United States. We should not be operating under a gag rule. We should not be relying on a traffic cone as a major deterrent on the Canadian border, and that is what we will be doing without the amendment that we want to vote on when we return.

------

## FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed a bill of the following title in which the concurrence of the House is requested:

S. Con. Res. 85. Concurrent resolution providing for a conditional adjournment or recess of the Senate and a conditional adjournment of the House of Representatives.

------

The SPEAKER pro tempore (Mr. OTTER). Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

(Ms. JACKSON-LEE addressed the House. Her remarks will appear hereafter in the Extensions of Remarks.)

------

## COMPUTER SECURITY ENHANCEMENT AND RESEARCH ACT OF 2001

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BAIRD) is recognized for 5 minutes.

Mr. BAIRD. Mr. Speaker, today I am introducing the Computer Security Enhancement and Research Act of 2001. This legislation will address the long-term needs in securing our Nation's information infrastructure and will strengthen the security of the nonclassified computer systems of Federal agencies. The bill establishes a research and development program on computer and network security at the

National Institute of Standards and Technology. It also strengthens the institute's existing responsibilities in developing best computer security practices and standards in assisting Federal agencies to implement effective computer and network security.

Because of the September 11 tragedy, attention is now focused in an unprecedented way on increasing our security against terrorism. Our concerns include protecting critical national infrastructures. Today, security has to mean more than locking doors or guarding buildings and installing metal detectors.

In addition to physical security, virtual systems that are vital to our Nation's economy must be protected. Telecommunications and computer technologies are vulnerable to attack from far away by enemies who can remain anonymous, hidden in the vast maze of the Internet. Examples of systems that rely on computer networks include the electric power grid, rail networks, and financial transaction networks. Just as enemies are achieving a sophistication to use the most complex weapons against us, our vital computer networks have become more interconnected and more accessible and, therefore, more vulnerable via the Internet.

The vulnerability of the Internet to computer viruses, denial-of-service attacks, and defaced Web sites is well known. These widely reported events have increased in frequency over time. These attacks disrupt business and government activities sometimes resulting in significant economic recovery costs. While no catastrophic cyberattack has occurred thus far, Richard Clarke, the President's new cyberterrorism czar, has said that the Government must make cybersecurity a priority or face, in his words, the possibility of a digital Pearl Harbor.

While potentially vulnerable computer systems are largely owned and operated by the private sector, the Government has an important role in supporting the research and development activities that will provide the tools for protecting information systems. An essential component for ensuring improved information security is a vigorous and creative research program focused on the security of networked information systems. Unfortunately, witnesses at a recent Committee on Science and Technology hearing indicated that current R&D efforts fall far short of what is required.

Witnesses at that hearing noted the anemic level of funding for research on computer and network security. This lack of funding has resulted in the lack of critical mass of researchers in the field and a lack of focus on safe, incremental research projects. The witnesses advocated increased and sustained research funding from a Federal agency assigned the role to support such research on a long-term basis. To date, Federal support for computer security research has been directed at de-

fense and intelligence needs. While this work on encryption and defense systems security protocols are absolutely vital, very little has been done on the civilian side of communications security.

The bill I am introducing explicitly addresses this gap in Federal support for computer security. My bill charges the National Institute of Standards and Technology with implementing a substantial program of research support based at institutions of higher education designed to improve the security of networked information systems. The research program is authorized for a 10-year period, growing from $25 million in the first year to $85 million in the fifth year. This may sound like a substantial amount of money, but the billions of dollars that are lost in successful computer attacks makes this paltry by comparison. Although the award would go to universities, the research projects may involve collaboration with for-profit companies that develop information security products.

The bill establishes a flexible management approach for the research program. It is based upon management style that has been used effectively by DARPA, the Defense Advanced Research Projects Agency, to spur advances in high technology fields. Specifically, management of the research program will rely on program managers who are both knowledgeable about computer security issues and needs and familiar with the research community. These program managers will be responsible for identifying and nurturing talented researchers and for generating innovative research proposals. Although program managers will have considerable freedom in managing their individual research portfolios, each will be reviewed periodically by NIST senior managers and by outside computer security experts. To ensure its relevance and continued need of this program, it will be reviewed in its fifth year for scientific merit and relevance by the National Academy of Sciences.

An expanded university-based research program will train new graduate students as well as postdoctoral research assistants, as well as attracting seasoned researchers to the field. The result will be a larger and more vibrant basic research enterprise in computer-related security fields. A separate set of awards will be available to support postdoctoral research fellowships and senior research fellowships both at universities and at NIST. The bill also increases support for ongoing, in-house computer security at NIST.

The Computer Security Enhancement and Research Act of 2001 builds on the long experience of NIST in developing computer security standards and practices by placing new responsibilities on the agency for building up the Nation's basic research enterprise in information security. By enlarging and strengthening the research enterprise, we can generate the ideas, approaches, and technologies needed to

provide for future cybersecurity in an insecure world.

Mr. Speaker, I thank the staff of the Committee on Science and Technology for their assistance in drafting this legislation, as well as the strong and hard efforts of Ms. Brooke Davidson on my staff, who has worked on this issue very diligently.

## CONDITIONAL ADJOURNMENT OF HOUSE AND RECESS OR ADJOURNMENT OF SENATE UNTIL TUESDAY, NOVEMBER 27, 2001

The SPEAKER pro tempore laid before the House the following privileged Senate concurrent resolution (S. Con. Res. 85) providing for conditional adjournment of the House and recess or adjournment of the Senate on Tuesday, November 27, 2001.

The Clerk read the Senate concurrent resolution, as follows:

### S. CON. RES. 85

*Resolved by the Senate (the House of Representatives concurring),* That when the House adjourns on the legislative day of Friday, November 16, 2001, Saturday, November 17, 2001, Monday, November 19, 2001, or Tuesday, November 20, 2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand adjourned until 2:00 p.m. on Tuesday, November 27, 2001, or until Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first; and that when the Senate recesses or adjourns at the close of business on Friday, November 16, 2001, or Saturday, November 17, 2001, on a motion offered pursuant to this concurrent resolution by its Majority Leader or his designee, it stand recessed or adjourned until noon on Tuesday, November 27, 2001, or at such other time on that day as may be specified by its Majority Leader or his designee in the motion to recess or adjourn, or until Members are notified to reassemble pursuant to section 2 of this concurrent resolution, whichever occurs first.

SEC. 2. The Speaker of the House and the Majority Leader of the Senate, acting jointly after consultation with the Minority Leader of the House and the Minority Leader of the Senate, shall notify the Members of the House and the Senate, respectively, to reassemble at such place and time as they may designate whenever, in their opinion, the public interest shall warrant it.

The SPEAKER pro tempore. Without objection, the Senate concurrent resolution is concurred in.

There was no objection.

A motion to reconsider was laid on the table.

## VISIT NATION'S CAPITAL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the District of Columbia (Ms. NORTON) is recognized for 5 minutes.

Ms. NORTON. Mr. Speaker, I come to the floor this afternoon not only to wish a happy holiday to my colleagues, but to ask them this Thanksgiving to carry a message home. I ask my colleagues to ask their constituents to visit them and visit their Nation's capital.

This is one way to send a visible, powerful message to the terrorists. Let them see Americans streaming into their capital to show they simply cannot be terrorized. The city has been hurt by September 11 because September 11 continues for us. It simply has not stopped. First came September 11. But then came the shutdown of National Airport, the only airport in the United States to be shut down, and it was shut down for 3 entire weeks. Try to think of your hometown without an airport.

Then came fear of flying and then fear of anthrax. Nothing has happened in our city and in our country since September 11. The only people to be struck by anthrax are those who worked in the back room of Brentwood. Even those who opened the envelope in the Hart Building have not gotten the disease. Surely people coming to the city have nothing to fear. The closedown of the airport and the anthrax scare were a one-two punch right at the gut of the Nation's capital.

Mr. Speaker, I am not asking for funds for the Nation's capital. I am asking for Members' constituents to visit the capital of the United States.

I spoke to a student group on the Mall last Saturday, and I am speaking to a group of teachers and principals this Saturday from around the country. No student should graduate from high school without coming to the Nation's capital, and yet there have been cancellation after cancellation of student tours.

### □ 1600

The capital needs your help. In the D.C. Subcommittee we learned that double-digit unemployment may be predicted here, 10,000 small businesses hanging on, half of our hotel and restaurant workers out of work. This is heartbreaking because the Nation's capital was doing so well coming out of a control board period. But now we are on the front line of the homeland war.

Of course, we need a targeted stimulus for the Nation's capital like New York got, but we are not asking for that this afternoon. We are asking you to help us let the free market do it. Bring the tourists back. Remind your constituents that your capital is open for business and you want to see them in your offices, you want to see them and begin to have the same kind of dialogue with them that you had before September 11.

Tell them to visit, not to cancel. Tell them there are bargains here now, bargains there will not be here a year from now. Of course, tours are not available in the Capitol and I very much regret that. But we are coming up to the point where tours once again will be available. In any case, they can come and sit in the gallery, they can come to your office and they can come and walk around the Capitol on their own.

This is not the time for Americans to turn their back on their own capital. A war in our homeland is the time precisely to come to the capital. As a little girl growing up during World War II, this capital was crowded with people from all over the United States, people in the service, civilians. It was a bustle of activity. It needs to be a bustle of activity today not only because the capital needs the capital that people would bring in the form of funds, but it needs the bustle of activity in order to help the country return to normalcy.

Members going home to their constituents can lead the way. If they hear from you, the leader in your district, that it is safe to come to Washington, you can help wipe away fear of anthrax, and especially fear of flying now that we have passed the airline security bill so proudly here this afternoon. When you come back, bring some of your constituents with you to the Nation's capital.

Happy Thanksgiving.

## IN OPPOSITION TO ANDEAN TRADE ACT'S TUNA PROVISIONS

The SPEAKER pro tempore (Mr. FORBES). Under the Speaker's announced policy of January 3, 2001, the gentleman from American Samoa (Mr. FALEOMAVAEGA) is recognized for 60 minutes as the designee of the minority leader.

Mr. FALEOMAVAEGA. Mr. Speaker, I could not help but feel it necessary to take this special order with the hope that my colleagues in the House, as well as the American people, can appreciate my concerns about the provisions of a certain piece of legislation that was just recently passed by this Chamber. This is in reference to H.R. 3009, the Andean Trade Agreement bill.

Mr. Speaker, the current trade policy with regards to canned tuna has provided significant benefits to certain Latin America countries, namely, Bolivia, Colombia, Peru, as well as Ecuador, while maintaining an industrial tuna processing base in the United States. Since the enactment of the Andean Trade Agreement 10 years ago, the number of tuna factories in that region, the Andean region in South America, has actually increased by 229 percent. Production capacity now is up 400 percent. Direct employment is up by 257 percent. U.S. exports have grown from about $15 million to $100 million annually.

In addition, the U.S. tuna industry has invested well over $30 million in new facilities and vessels. However, I must repeat, extending this agreement by providing duty-free treatment to canned tuna from our Andean friends and countries there in Latin America, especially Ecuador, in my humble opinion, Mr. Speaker, will practically destroy the entire U.S. tuna industry.

I have heard the argument that Congress has included canned tuna both in the Caribbean Basin Initiative, as well as NAFTA, and some have questioned why are we not doing the same for Ecuador and the Andean region. The simple answer is that no other country
